I would like to voice my opposition to the NAB petition 04-160 to reject this petition . I think that the broadcast station should not rely on the government to take away there competition. They should broadcast what the people want to here or see. They would not then have to worry about competition. This is a free country and I should be able to here or see what ever I want to see or here as long as I am willing to pay for it without government or anyone else stopping me.
